

PRODUCT OVERVIEW

IT Essentials

Microsoft 365, security, backup and day-to-day support, run as one service by one team.

Communications, IT & Cybersecurity.
Business Technology, Made Simple.

One Supplier, One Number

Microsoft 365, backup, security, training and support come from one company, so when something stops working there is one number to ring and nobody to pass you on to.

Watched Before You Notice

Device health, updates and security alerts are monitored from one dashboard, so we look into problems as they develop rather than wait for someone to report them.

Cover on Every Route In

Attacks arrive by email, through a laptop, or through a reused password, so protection sits on all three, and your team is trained to spot what gets through.

A Copy Microsoft Doesn't Keep

Microsoft keep the service running; the data is your responsibility. We back up mail, files, sites and Teams, so deletions are recoverable.

Eight services, set up and run by us, covering the platform your team works on and the ways attacks get in.

Microsoft 365

Email, files and the Office apps on the plan that fits how your team works, set up and supported by us.

Microsoft 365 Backup

A separate copy of your mail, files, sites and Teams data, restored one item at a time when something goes.

Email Security

Messages are checked before they reach anyone, stopping phishing, fake invoices and malicious attachments.

Endpoint Security

Acronis watches laptops and desktops for suspicious behaviour, not only known viruses, and contains threats.

Security Awareness Training

Short videos and harmless test phishing emails, so your team learns to spot a scam rather than hear about one.

Password Manager

An encrypted Keeper vault, so staff stop reusing passwords or keeping them in notes and spreadsheets.

Monitoring & Remote Support

Device health sits in one NinjaOne dashboard, so we apply updates and fix many problems without coming to site.

Cyber Essentials Support

We help you scope the assessment and close the gaps. A certification body reviews it and awards the certificate.

NEXT STEP

Book an IT Review

We look at what you have now, tell you where the gaps are and give you the plan and the price before anything changes.
