

PRODUCT OVERVIEW

Internet Connectivity

Business internet chosen for your site, your usage and your plans, then looked after by us.

Communications, IT & Cybersecurity.
Business Technology, Made Simple.

Not Tied to One Carrier

We are not owned by a network, so we look right across the UK carriers and recommend what genuinely serves your postcode, rather than the one line we happen to carry.

Sized for How You Work

A five person office and a forty person office need very different things. We look at how many of you there are, what you run, and how much of it now sits in the cloud.

One Number When It Breaks

If the line goes down you ring us, not the carrier. We log it, chase them and keep you posted, so nobody is left explaining your setup to a stranger on a bad morning.

A Connection That Reaches

Fibre does not reach every building, and some sites cannot wait for it to arrive. Where it is not there yet, there are other ways to get you online and working properly.

We check what is available at your address first, then match the connection to how the site is used.

Full Fibre (FTTP)

Fibre runs all the way into the building, so speeds hold up at busy times. It is the first thing we look for, and usually the best value.

SoGEA Broadband

Broadband over your existing line, without paying for a phone line nobody uses. A sensible step where full fibre has not reached you yet.

Dedicated Leased Lines

A connection reserved for your business alone, at the same speed up and down. Worth it when an hour of downtime costs more than the line does.

Starlink Satellite

Satellite internet for sites fibre does not reach, or cannot reach soon enough. We place the order, get the kit to you and set it up with you.

4G and 5G Mobile Broadband

Mobile data as the main connection on a temporary site, or as a backup that keeps you working while a fixed line is being put right.

One Number When It Goes Wrong

You ring us, not the carrier. We log the fault, chase it and keep you updated to the response times in our Service Level Agreement.

CUSTOMER STORY

“From the very beginning, we had full support from Lucy, who ... liaised with Starlink to get our internet connection set up. Kyle and John ... did a great job ensuring our entire building ... had full internet coverage, which was not an easy task in a Grade I listed 12th century castle.”

Walworth Castle Hotel

NEXT STEP

Check Your Address

Tell us your postcode and we will come back with what is actually available there, what it would cost and how long it would take.
