

PRODUCT OVERVIEW

Business Mobiles

Phones and SIMs for your team, on the network that works where you do, all on one F One bill.

Communications, IT & Cybersecurity.
Business Technology, Made Simple.

Signal Where Your People Are

Coverage varies. We check Vodafone, O2 and EE against where your people actually work and travel, then recommend the one with a signal there.

One Bill, One Number to Ring

Your mobiles sit on the same monthly F One invoice as everything else we supply. If something goes wrong you ring us, not a network call centre.

Built Around How You Work

Nobody is pushed onto one plan. Heavy data users, desk-based staff and the occasional traveller each get the tariff and term that suits them.

More Than Handsets

A lift line, a camera, a van tracker, a backup for your broadband. Anything that needs a mobile signal can come from us on the right kind of SIM.

What Makes It Work

We start with where your people work and what they need to do, then build the plan around that.

Vodafone, O2 or EE

Three networks to choose from, and we are not tied to any of them. The right answer is the one with the best signal at your sites, and it can differ from person to person.

Rolling Monthly to 36 Months

Agreements run rolling monthly, 12, 24 or 36 months. Longer terms bring the cost down; shorter ones keep you flexible while a team is still changing.

Handsets and Devices

We supply phones and other hardware when you need them, from any manufacturer, alongside the SIM. There is no standard list, because every business is different.

IoT SIMs for Things, Not People

Cameras, alarms, trackers, card terminals, lift lines and backup routers all need a signal but use little data. An IoT SIM costs little each month and you only pay for what it actually uses.

4G and 5G for Internet

Mobile data as the main connection on a site fibre cannot reach yet, or as a backup that takes over the moment your fixed line fails.

Roaming Sorted Before You Fly

Tell us where you are going and we will check what your network charges there and put the right bolt-on in place, so there is no surprise on the bill when you get back.

NEXT STEP

Check Your Coverage

Tell us where your people work and we will come back with the network that suits, what it would cost and how soon you could be up and running.

Roaming charges depend on your network and the country you're in. Most destinations are covered by a simple daily pass that lets you use your UK allowance abroad, within limits. This is how each network handles it.

EE

On the day you first use data, calls or texts in one of the countries below, a daily charge applies and your UK allowance is unlocked for that day. A single megabyte of data triggers it.

Europe Zone — £2.50 per day plus VAT

Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden.

Before You Travel

If you're on an unlimited UK data plan, roaming data is capped at 25GB per billing month.

Destinations not listed here may carry far higher charges.

Talk to us before you fly. We check your destination and put the right bolt-on in place so your roaming costs stay as low as possible.

NEXT STEP

Travelling Soon?

Tell us where you're going and when, and we'll make sure the right pass is on your account before you leave.
