- ✓ Full MESH WiFi Networks & Networking Solutions
- ✓ Vodafone, EE, O2 & Three Mobile SIM Plans
- ✓ IT Services
- ✓ WhatsApp for Business

Key Benefits for Your Doctor's Surgery.

CRM Integration

Enhance efficiency with seamless integration into EMIS Web, SystemOne, and other practice systems. Automatically link calls to patient records, saving time and helping your team deliver a more personalised and efficient service to every patient.

Call Queuing with Auto Callbacks

Manage busy phone lines with call queuing and automatic callbacks. Patients can stay in the queue or request a callback without losing their place, improving their experience and taking the pressure off your reception team, particularly during busy periods.

SmartVoice Messaging

Keep patients informed while they wait with SmartVoice. Promote flu clinics, remind them about repeat prescriptions, or share practice updates using professional, AI-generated on-hold messages, improving communication and increasing engagement.
