- ✓ Business Fibre Broadband
- ✓ Full MESH WiFi Networks & Networking Solutions
- ✓ Vodafone, EE, O2 & Three Mobile SIM Plans
- ✓ IT Services
- ✓ WhatsApp for Business

## Key Benefits for Your Doctor's Surgery.

### CRM Integration

Enhance efficiency with seamless integration into EMIS Web, SystmOne, and other practice systems. Automatically link calls to patient records, saving time and helping your team deliver a more personalised and efficient service to every patient.

### Call Queuing with Auto Callbacks

Manage busy phone lines with call queuing and automatic callbacks. Patients can stay in the queue or request a callback without losing their place, improving their experience and taking the pressure off your reception team, particularly during busy periods.

### SmartVoice Messaging

Keep patients informed while they wait with SmartVoice. Promote flu clinics, remind them about repeat prescriptions, or share practice updates using professional, AI-generated on-hold messages, improving communication and increasing engagement.
