Our Core Products.
WiFi.

FONE
TECHNOLOGIES
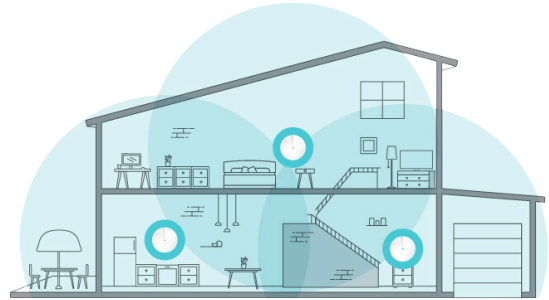

Our WiFi solutions offer more than just a signal; they include advanced network monitoring and control capabilities. Our team designs, delivers, and maintains WiFi networks with unmatched speed and signal strength across your site.

MESH Networking.

Mesh networking enhances your WiFi setup, improving reliability and resilience. Access points are strategically placed and continuously monitored and updated. We can remotely identify, assess, and fix any coverage gaps.

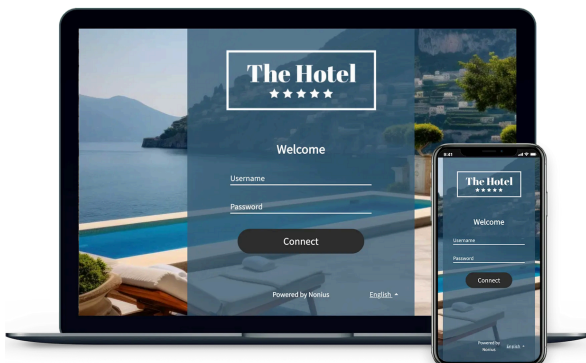

Network Support.

Our advanced cloud controller platform allows our technical team to remotely manage your entire WiFi network. This gives you access to the latest software upgrades and ensures prompt, effective support.

Full Site Coverage.

Maximise your high-speed internet connection with our strategically placed, compact, and powerful access points throughout your premises.

Social WiFi and Analytics.

Social WiFi offers your customers a reliable and secure connection, in exchange for basic contact information, enhancing customer engagement. This data can then be leveraged to keep your customers informed about your latest products and offers.
