F1ONE
TECHNOLOGIES

Enhance your tenants' experience with our cost-effective, feature-rich cloud phone systems, designed for effortless deployment and scalability, catering to both individual entrepreneurs and larger teams.

Easy system management.

Our online portal streamlines operations, allowing quick on-boarding of tenants and easy adjustment to their evolving needs, reducing administrative costs and enhancing tenant satisfaction. Furthermore, it offers real-time updates and notifications, keeping both property managers and tenants informed and engaged, which helps in building a strong, communicative relationship between all parties involved.

Call reporting.

Our call analysis provides business centres and tenants with detailed tracking of all calls, simplifying billing with exact logs and offering tenants clear insights into their phone usage. This feature not only ensures transparency in billing and usage but also helps tenants optimise their communication strategies based on data-driven insights, leading to more efficient and cost-effective operations.

"Our new cloud phone system has transformed our operations at Arena. Setting up new tenants is effortless, and the online portal lets us manage needs swiftly and easily. A game changer for tenant satisfaction. Highly recommended!"

Julie Fisher
Arena Business Centres

Flexible and efficient remote working.

Our cloud phone system enables business centre tenants to transcend physical office boundaries, ensuring flawless communication, whether through mobile or softphone apps, for unparalleled service delivery regardless of location. This flexibility also allows for easy scaling and customisation of communication features to suit the unique needs of each tenant, enhancing their operational efficiency and ability to respond swiftly to business demands.
