

Boost Engagement and Insights with Social WiFi & Data Capture.

Why Choose F One for Your Social WiFi & Data Capture.

At F One, we help businesses do more with their WiFi. Our Social WiFi solution not only provides your visitors with fast, secure, and branded internet access but also helps you gather valuable insights about your customers.

By capturing data like contact details and demographics, you can learn more about your audience and improve the way you engage with them.

Our system is easy to set up, fully GDPR-compliant, and works seamlessly with our WiFi solutions. With features like automated surveys and personalised messaging, it's a powerful way to enhance your customer experience, build loyalty, and grow your business.

-  **Simple Integration**
Our cloud-based software works with our MESH WiFi solutions, making it quick and easy to get started.
-  **Customised Login Portals**
Create login pages that match your brand. Visitors can log in using social media, a simple form, or Single Sign-On (SSO), offering flexibility and convenience.
-  **Real-Time Data Collection**
Instantly capture valuable information about your visitors, like their contact details and demographics, to help you understand your audience better.
-  **GDPR-Compliant Data Storage**
Rest assured knowing all customer data is collected and stored securely, meeting GDPR and other data protection requirements.
-  **Personalised Marketing**
Use the data you collect to send tailored messages, promotions, or offers that match your customers' interests, keeping them engaged and coming back.
-  **Better Visitor Experiences**
Greet returning customers with personalised messages and create unique offers based on their preferences, ensuring every visit feels special.
