Elevate is a fully cloud-based communications platform that provides your business with a full telephone system solution accessible through a physical phone, mobile app and PC software, allowing you access to a full range of phone system features, as well as ultimate flexibility.

Getting Started.

To connect to the service and start using the Elevate platform, download the necessary softphone application for you by clicking the link below:

Elevate Applications

Next Step.

If you plan on using the mobile app alongside the various other Elevate applications, please visit the app store on your iOS or Android device, and search for and download the 'Elevate UC App'.

Final Step.

Once you've installed the softphone and mobile apps, please login with your username and password. This will have been provided to you by the account holder that we have on file. If you're the account holder and you're yet to receive these details, please email service@fonetech.uk to request them.
